

**1.What percentage of the lecture videos have you watched so far?**

So far, I have been watching my weekly lecture videos.

**2.What time, location and duration have you scheduled to watch lecture videos?**

I plan to watch the lecture video at home every Monday night.

**3.What are you doing well in the subject so far that you will keep doing?**

I think the best I did in this course is to spend a long time reviewing what the teacher said in class, and I will continue to

**4.What do you need to stop or change in your work for this subject overall so far?**

I think I should use my mobile phone less when writing code to avoid distraction, so as to improve learning efficiency and reduce procrastination.

**5.What are you currently doing poorly for practicals in this subject that you will change?**

What I didn't do well in the practical part was that I didn't write the code according to the teacher's requirements. I often forgot to write the pseudo-code first, which led to logical errors in the code I wrote.

**6.What are you doing really well for practicals in this subject?**

I think what I did well in the practice part was that I could finish the weekly homework in advance, instead of starting to write before the deadline.
